

# SUBTEX®

# 140

PROTECTION OF FODDER

- Breathable
- Water repellent
- 45° slope
- Maximum Stretching

**SUBTEX® 140** is a non-woven Polypropylene protective fabric of 140gr/m<sup>2</sup>. It allows **the bales to breathe** and avoid condensation. It's the solution against strong winds and bad weather for your forages stored outdoors. This cover is very flexible, so it must **be stretched as much as possible** so that **water runs off easily**.

## SIZES

10,40x12,5m

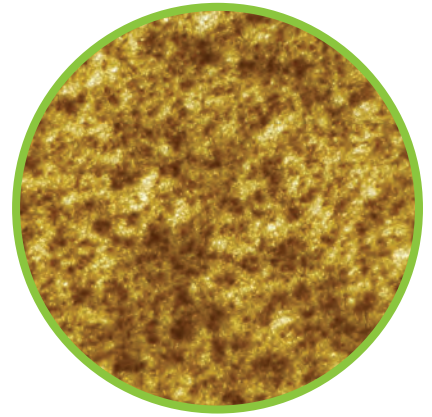

10,40x25m

13x25m

15,60x15,60m

15,60x25m

18x25m
