

CLACPACK®

SUSTAINABLE FIXATION

- Easy to use
- Strong
- Reusable
- Functional

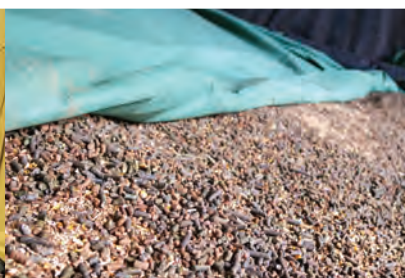

CLACPACK® is an innovative solution to **ballast efficiently and sustainably** the tarpaulin. It is made of a strong plastic, which is clipped to a flexible plastic, and this kind of fixation **avoid drilling** the tarp. Each **CLACPACK®** needs to be fix every meter with a maximum weight of 8 kg so that the tarpaulin **is constantly stretched**.

STEPS FOR FIXING CLACPACK® ON A SUBTEX® FABRIC

INSTALLATION NOTICE

- . A kit of 40 CLACPACK® is needed for a tarpaulin
- . Fix a CLACPACK® every meter with a weight of approximately 7-8 kg, using ideally a SILOBAG of 27x70cm
- . The weight must not touch the ground to maintain the tarp in place and fully tensioned
- . The rough side of CLACPACK® must face in and the smooth side must face out
- . The flexible plastic can be sold separately in case of special need or any lost
