

# HOW TO GROOM LIKE A PRO

## WITH SHOWSHEEN®

### POLISH & DETANGLER

#### Detangling

Apply ShowSheen® to manes and tails before detangling, making sure to coat the ends. *Tip: Using your fingers to unravel knots will reduce breakage.*

#### Burrs & Sand Spurs

Apply polish or gel to area and allow to soak in for 5 minutes, then burrs will slide right out. *Tip: Isolate clumps of burrs by pulling hairs away from them. Spray problem areas before turnout to reduce grooming time.*

#### Repel Dust

Apply our polish over the coat to keep the horse clean longer.

#### Muddy Legs

Apply polish to legs to keep mud from sticking during turnout.

#### Drying Out

New Pro-Vitamins and Silk Proteins add moisture to hair shaft for deep conditioning.

#### Enhanced Shine

Apply polish directly or spray onto a rag or brush. Use Finishing Mist version for a light, even distribution. Skip the saddle area if you're about to ride.

#### Fly-Aways

Smooth down unruly fly-aways with a spray of ShowSheen®.

#### Clipping

Apply polish liberally to areas to be clipped and let dry. This helps clippers glide through hair, reducing clipper marks, and clippers won't get as hot or dull as quickly.

#### Blanketing

Apply polish before blanketing your horse to keep him more comfortable in winter. It reduces friction points, eliminates static electricity, and keeps the coat smelling fresh.

### 2-IN-1 SHAMPOO & CONDITIONER

#### Horse-Healthy

A horse's skin is 4x more sensitive than a human's. Wash with sulfate and paraben-free 2-in-1 Shampoo. It's pH balanced for a horse's sensitive skin.

#### Clean & Condition

2-in-1 Shampoo cleans thoroughly, then conditions with Pro-Vitamins and Silk Proteins for soft, healthy hair.

#### Scurf

Frequent washing with harsh detergent can cause scurf or dandruff. ShowSheen® 2-in-1 Shampoo & Conditioner will not cause scurf.

### STAIN REMOVER & WHITENER

#### Color-Safe Whitening

Oxi-Eraser® technology whitens with no bleach or bluing agents, so it's effective on all colors.

#### White Hooves

Spray over outside of hoof, wait 5 minutes, then scrub with a stiff brush for extra-white hooves.

#### Spot Cleaning

Apply whitener and lightly scrub, leave for 5 minutes, then wipe off with a wet towel.
