

## Coupling Ball Type 750-00282-01

Item #: 8004631

Datasheet: 2.06.200

Type: Zugkugeleinsatz

AP-Code: A-PAV-B-CG1-OP-NH-9

(A) mm: 46

(B) mm: 70

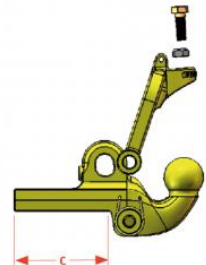

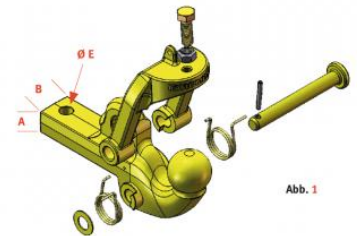

(C) mm: 190

(E) mm: 25

Connection type: Kugel80

Weight: 21 kg

fix integrated ball, D=80mm, suitable for retrofitting pickup hitches

If you are unsure about the assignment, please use the sketch of the illustrated hook and supplement the table with the dimensions. Send this to our technical support.

Suitable power steering devices can be found on data sheet 6.05.020

Only for connection to ball-type trailer shanks 80 according to ISO 24347

The D value and the maximum vertical load of the hitch support must be observed. The respective lower value shall be applicable. The pertinent regulations (e.g. Accident Prevention Regulations for Vehicles) and the attachment guidelines of the vehicle manufacturers must be observed when installing the coupling! This must be released either by type approval or individual approval and always in combination with the support (e. g. ball-type drawbar)

Official national regulations must be observed. For example: in Germany the obligations in §13 FZV regarding the permissible trailer weight and vertical load as indicated in the vehicle registration documents must be considered. Assembly must be carried out by a technical expert. Installation only made from an authorized specialist workshop. Installation and operating instructions must be observed!
